OCTOBER/NOVEMBER 2016 EXAMINATION

COURSE TITLE: MYCOLOGY

COURSE CODE: BIO 311

TIME ALLOWED: 2 HOURS

INSTRUCTION: ANSWER QUESTION 1 AND ANY OTHER THREE QUESTIONS

1. Discuss **five** criteria commonly used in the primitive classification of fungi highlighting their advantages and disadvantages. **25 marks**

2. (a). Give the distinguishing characters of the different classes of fungi shown in the table below and give an example in each case.

Fungi Class	Distinguishing Characters	Example
Chytridiocetes		
Oomycetes		
Zygomycetes		
Ascomycetes		
Basidiomycetes		
Deuteromycetes		
Yeast		

11 marks

- (b). Distinguish between lower and higher fungi. **4 marks**

3. (a). Explain with an example how the nomenclature of fungi is binomial. **4 marks**

- (b). Give the standard name endings for the following taxa of fungi: **6 marks**

Divisions:

Subdivisions:

Classes:

Sub-classes:

Order:

Family:

- (c). How are systemic mycoses acquired? Give **three** examples each of the two groups of systemic mycoses. **5 marks**

4. (a). Briefly describe wine production **7 marks**
(b). Discuss the discovery of antibiotics **5 marks**
(c.). What is blastomycosis and which organism causes it? **3 marks**
5. (a). Distinguish very clearly between superficial and subcutaneous mycoses. **5 marks**
(b). Give three examples each for superficial and subcutaneous mycoses. **6 marks**
(c). Discuss briefly any one of the examples of subcutaneous mycoses. **4 marks**
6. (a). Differentiate between asexual and sexual reproduction in fungi. **3 marks**
(b). Discuss any **three** types of the following:
(i) Asexual spores **6 marks**
(ii) Sexual spores **6 marks**
