Answer: Afforestation

Question MCQ21 : Deforestation is caused by ?

Answer: All of the options

Question MCQ22 : The hottest desert in the world is?

Answer: Sahara

Question MCQ23 : What is the main cause of deforestation?

Answer: Agricultural expansion

Question MCQ24 : What do trees produce that is crucial to the survival of man

Answer: Oxygen

Question MCQ25 : The most responsible factor for the world's water crisis is

Answer: Droughts

Question MCQ26 : Soil erosion can be prevented by

Answer: Afforestation

Question MCQ27 : Green plants are also called

Answer: Producers

Question MCQ28 : The Ramsar Convention is about the conservation of?

Answer: Wetlands

Question MCQ29 : The study of the inter-relationship between organisms and the environment is?

Answer: Ecology

Question MCQ30 : Many plants and animals are on the verge of extinction because of?

Answer: Habitat destruction

Question MCQ31 : Animals and plants are best protected in ____

Answer: National parks

Question MCQ32 : The gradual extension of deserts into areas that were not originally desert is?

Answer: Desertification

Question MCQ33 : Desert encroachment occur when all but one of these occur

Answer: Increase in soil depth

Question MCQ34 : The most important reason for decrease in biodiversity is

Answer: Habitat destruction

Question MCQ35 : Which of the following is true about deserts?

Answer: Deserts have bare surfaces

Question FBQ1 : Moisture in the air is known as _____

Answer: Humidity

Question FBQ2 : The formation of soil is caused by the _____ process

Answer: Weathering

Question FBQ3 : The formation of soil is caused by the _____ process

Answer: Weathering

Question FBQ4 : A zoo is an example of _____ conservation of animals

Answer: Ex-situ

Question FBQ5 : Pedology is the study of _____

Answer: Soil

Question FBQ6 : The depletion of _____ is caused by chlorofluorocarbons (CFC) in the atmosphere

Answer: Ozone

Question FBQ7 : Soil fertility is enhanced by _____ rotation

Answer: Crop

Question FBQ8 : Very rare and uncommon plants and animals are _____ species

Answer: Endangered

Question FBQ9 : _____ refers to the thin film of oil in sea water

Answer: Oil slick

Question FBQ10 : Acid is an example of _____ waste

Answer: Corrosive

Question FBQ11 : Incineration of municipal waste involves _____

Answer: Oxidation

Question FBQ12 : Accumulation of salts in the soil is known as _____

Answer: Salinization

Question FBQ13 : Lead in water can cause _____ damage

Answer: Kidney

Question FBQ14 : Rain water harvesting is a major method adopted in the conservation of _____

Answer: Water

Question FBQ15 : Death rate is also called _____ rate

Answer: Mortality

Question FBQ16 : Birth rate is called _____

Answer: Natality

Question FBQ17 : Bronchitis is a disease aggravated by _____ pollution

Answer: Air

Question FBQ18 : Increase of greenhouse gases (GHGs) in the atmosphere causes _____

Answer: Global warming

Question FBQ19 : The _____ is the legally binding international agreement to reduce GHGs by 5%

Answer: Kyoto Protocol

Question FBQ20 : The unit of measurement of the intensity of sound is known as _____

Answer: Decibels

Question FBQ21 : Mulching helps in _____ conservation in soils

Answer: Moisture

Question FBQ22 : The ozone layer can be found in the _____

Answer: Stratosphere

Question FBQ23 : Smog is a mixture of smoke and _____

Answer: Fog

Question FBQ24 : Afforestation prevents the occurrence of _____ erosion

Answer: Soil

Question FBQ25 : World water crisis is mainly caused by _____

Answer: Drought

Question FBQ26 : DDT is a _____ pollutant

Answer: Non-biodegradable

Question FBQ27 : _____ are areas of standing water that support aquatic plants

Answer: Wetlands

Question FBQ28 : Freshwater and _____ are types of aquatic ecosystems

Answer: Marine

Question FBQ29 : The dominant second trophic level in a lake ecosystem is _____

Answer: Zooplankton

Question FBQ30 : In a biotic community, the primary consumers are _____

Answer: Herbivores

Question FBQ31 : The removal of trees consequently leads to the increase of _____ in the air

Answer: Carbon dioxide

Question FBQ32 : The entire living organisms, plants and animals that exists on the planet are referred to as _____

Answer: Biodiversity

Question FBQ33 : When a species cannot be found within its normal ecosystem, it is referred to as _____

Answer: Extinct

Question FBQ34 : _____ is the destruction of habitat of plants and animals

Answer: Habitat loss

Question FBQ35 : In biodiversity, plants can be classified as _____

Answer: Flora
