

<br/><br/>Question FBQ1 : Flood is both negative and\_\_\_\_\_ benefits  
<br/>Answer: Positive

<br/><br/>Question FBQ2 : The characteristics of long rainfall flood can be classified into \_\_\_\_\_Types  
<br/>Answer: 4

<br/><br/>Question FBQ3 : \_\_\_\_\_ is concern with specific events that destroys life's and property to an extent that international assistance often needed  
<br/>Answer: Hazard

<br/><br/>Question FBQ4 : The three types of drought are \_\_\_\_\_ hydrological and agricultural  
<br/>Answer: Meteorological

<br/><br/>Question FBQ5 : Desertification can be described as land degradation in arid\_\_\_\_\_Dry humid, areas  
<br/>Answer: Semi-arid

<br/><br/>Question FBQ6 : Coastal floods are of three kinds, they include metrological disturbances, seismic disturbances and\_\_\_\_\_  
<br/>Answer: Lakeshore

<br/><br/>Question FBQ7 : The severity of desertification in Nigeria is found in the\_\_\_\_\_ Regions  
<br/>Answer: Sudano-sahelian

<br/><br/>Question FBQ8 : \_\_\_\_\_ simply means the earth is constantly changing system  
<br/>Answer: Earthquake

<br/><br/>Question FBQ9 : \_\_\_\_\_ represent energy release and transmission  
<br/>Answer: Seismic-wave

<br/><br/>Question FBQ10 : \_\_\_\_\_and human activities are causes of desertification  
<br/>Answer: Drought

<br/><br/>Question FBQ11 : There are about \_\_\_\_\_volcanoes in the world  
<br/>Answer: 500

<br/><br/>Question FBQ12 : Basic socio economic impact of drought and desertification include unemployment, political problems, and insurgency and\_\_\_\_\_  
<br/>Answer: Migration

<br/><br/>Question FBQ13 : Volcanoes are found in three\_\_\_\_\_ setting  
<br/>Answer: Tectonic

<br/><br/>Question FBQ14 : The impact of drought and desertification Nigeria includes, ecological degradation, agricultural reduction health problem and availability  
<br/>Answer: Loss of biodiversity

<br/><br/>Question FBQ15 : Volcanic gases released by eruption and lava flow commonly include hydrogen, carbon monoxide, chlorine and\_\_\_\_\_  
<br/>Answer: Water vapour

<br/><br/>Question FBQ16 : There are \_\_\_\_\_types of landslide terrain  
<br/>Answer: 5

<br/><br/>Question FBQ17 : According to smith (1999) \_\_\_\_\_artificial barriers and water sprays are the three possible three method of controlling lava flows  
<br/>Answer: Bombing

<br/><br/>Question FBQ18 : \_\_\_\_\_is an effect of acid rain  
<br/>Answer: Heavy forest

<br/><br/>Question FBQ19 : Post disaster preparedness includes provision of medical facilities, food and \_\_\_\_\_To victims of lava flow  
<br/>Answer: Shelter

<br/><br/>Question FBQ20 : the most reliable monitoring techniques of volcanic eruption are\_\_\_\_\_and ground deformation measurement  
<br/>Answer: Seismic

<br/><br/>Question FBQ21 : the Chad basin development commission is made up of Chad, Cameroon \_\_\_\_\_and Nigeria  
<br/>Answer: Niger

<br/><br/>Question FBQ22 : Traditionally, volcanoes have been classified as active \_\_\_\_\_ And extinct  
<br/>Answer: Dormant

<br/><br/>Question FBQ23 : Rift resumes occur where tectonic plates are \_\_\_\_\_  
<br/>Answer: Divergent

<br/><br/>Question FBQ24 : The most explosive volcanic eruptions are accompanied by pyroclastic flows sometime called \_\_\_\_\_  
<br/>Answer: Nies adents

<br/><br/>Question FBQ25 : the first known attempt to divert a lava fork place in \_\_\_\_\_ 1669  
<br/>Answer: Sicily

<br/><br/>Question FBQ26 : The point on fault at which break occurs first during earthquake is called\_\_\_\_\_  
<br/>Answer: Focus

<br/><br/>Question FBQ27 : The most reliable monitoring techniques of volcanic eruption are \_\_\_\_\_and ground deformation measurement  
<br/>Answer: Seismic

<br/><br/>Question FBQ28 : A secondary hazard of earthquakes in cities is \_\_\_\_\_  
<br/>Answer: Fire

<br/><br/>Question FBQ29 : GPS measurement obtained from \_\_\_\_\_Are now available to reveal the surface displacement of volcanoes  
<br/>Answer: Satellite

<br/><br/>Question FBQ30 : The down slope movement of rocks and soil debris is called\_\_\_\_\_  
<br/>Answer: Landslide

<br/><br/>Question FBQ31 : The strength of a material under landslide depends on \_\_\_\_\_ and internal friction  
<br/>Answer: Internal cohesion

<br/><br/>Question FBQ32 : industrialized countries have made progress at reducing the impact hurricane\_\_\_\_\_earthquake and landslide  
<br/>Answer: Flood

<br/><br/>Question FBQ33 : Several tropical cities such as Rio de janerio and\_\_\_\_\_ Are at risk of landslide  
<br/>Answer: Hong Kong

<br/><br/>Question FBQ34 : historically, the avalanche problem has always been severe in \_\_\_\_\_than north America because the population density is higher

<br/>Answer: Europe

<br/><br/>Question FBQ35 : Snow avalanche is a special type of \_\_\_\_\_

<br/>Answer: Flood

<br/><br/>Question MCQ1 : Flood is both negative and\_\_\_\_\_benefits

<br/>Answer: Positive

<br/><br/>Question MCQ2 : The characteristics of long rainfall flood can be classified into\_\_\_\_\_Types

<br/>Answer: 4

<br/><br/>Question MCQ3 : \_\_\_\_\_is concern with specific events that destroys life's and property to an extent that international assistance often needed

<br/>Answer: Hazard

<br/><br/>Question MCQ4 : The three types of drought are \_\_\_\_\_, hydrological and agricultural

<br/>Answer: Meteorological

<br/><br/>Question MCQ5 : Desertification can be described as land degradation in arid\_\_\_\_\_ Dry humid, areas

<br/>Answer: Semi-arid

<br/><br/>Question MCQ6 : Coastal floods are of three kinds, they include metrological disturbances, siesmic disturbances and\_\_\_\_\_

<br/>Answer: Lakeshore

<br/><br/>Question MCQ7 : The severity of desertification in Nigeria is found in the\_\_\_\_\_ Regions

<br/>Answer: Sudano-sahelian

<br/><br/>Question MCQ8 : \_\_\_\_\_simply means the earth is constantly changing system

<br/>Answer: Earthquake

<br/><br/>Question MCQ9 : \_\_\_\_\_ represent energy release and transmission

<br/>Answer: Seismic-wave

<br/><br/>Question MCQ10 : \_\_\_\_\_and human activities are causes of desertification

<br/>Answer: Drought

<br/><br/>Question MCQ11 : There are about \_\_\_\_\_volcanoes in the world

<br/>Answer: 500

<br/><br/>Question MCQ12 : Basic socio economic impact of drought and desertification include unemployment, political problems, insurgency and\_\_\_\_\_

<br/>Answer: Migration

<br/><br/>Question MCQ13 : Volcanoes are found in three\_\_\_\_\_ setting

<br/>Answer: Tectonic

<br/><br/>Question MCQ14 : The impact of drought and desertification in Nigeria includes, ecological degradation, agricultural reduction, health problem and ?

<br/>Answer: Loss of biodiversity

<br/><br/>Question MCQ15 : Volcanic gases released by eruption and lava flow commonly include hydrogen, carbon monoxide, chlorine and\_\_\_\_\_

<br/>Answer: Water vapour

<br/><br/>Question MCQ16 : There are\_\_\_\_\_types of landslide terrain

<br/>Answer: 5

<br/><br/>Question MCQ17 : According to smith (1999) \_\_\_\_\_artificial barriers and water sprays are the three possible three method of controlling lava flows  
<br/>Answer: Bombing

<br/><br/>Question MCQ18 : \_\_\_\_\_is an effect of acid rain  
<br/>Answer: Heavy forest

<br/><br/>Question MCQ19 : Post disaster preparedness includes provision of medical facilities, food and\_\_\_\_\_to victims of lava flow  
<br/>Answer: Shelter

<br/><br/>Question MCQ20 : The most reliable monitoring techniques of volcanic eruption are\_\_\_\_\_and ground deformation measurement  
<br/>Answer: Seismic

<br/><br/>Question MCQ21 : The Chad basin development commission is made up of Chad, Cameroon\_\_\_\_\_and Nigeria  
<br/>Answer: Niger

<br/><br/>Question MCQ22 : Traditionally, volcanoes have been classified as active, \_\_\_\_\_ and extinct  
<br/>Answer: Dormant

<br/><br/>Question MCQ23 : Rift resumes occur where tectonic plate are?  
<br/>Answer: Divergent

<br/><br/>Question MCQ24 : The most explosive volcanic eruptions are accompanied by pyroclastic flows sometime called\_\_\_\_\_  
<br/>Answer: Nies adents

<br/><br/>Question MCQ25 : The first known attempt to divert a lava fork place in \_\_\_\_\_1669  
<br/>Answer: Sicily

<br/><br/>Question MCQ26 : The point on fault at which break occurs first during earthquake is called....  
<br/>Answer: Focus

<br/><br/>Question MCQ27 : The most reliable monitoring techniques of volcanic eruption are \_\_\_\_\_...and ground deformation measurement  
<br/>Answer: Seismic

<br/><br/>Question MCQ28 : A secondary hazard of earthquakes in cities is \_\_\_\_\_  
<br/>Answer: Fire

<br/><br/>Question MCQ29 : GPS measurement obtained from \_\_\_\_\_ are now available to reveal the surface displacement of volcanoes  
<br/>Answer: Satellite

<br/><br/>Question MCQ30 : The down slope movement of rocks and soil debris is called\_\_\_\_\_  
<br/>Answer: Landslide

<br/><br/>Question MCQ31 : The strength of a material under landslide depends on \_\_\_\_\_ and internal friction  
<br/>Answer: Internal cohesion

<br/><br/>Question MCQ32 : industrialized countries have made progress at reducing the impact hurricane, \_\_\_\_\_earthquake and landslide  
<br/>Answer: Flood

<br/><br/>Question MCQ33 : Several tropical cities such as Rio de janerio and\_\_\_\_\_are at risk of landslide  
<br/>Answer: Hong Kong

<br/><br/>Question MCQ34 : Historically, the avalanche problem has always been severe in \_\_\_\_\_ than north America because the population density is higher  
<br/>Answer: Europe

<br/><br/>Question MCQ35 : Snow avalanche is a special type of \_\_\_\_\_  
<br/>Answer: Flood
