

Question <p>Origin of life on earth has been accounted for by which theory
_____</p>

Question <p>The only theory concerning the origin of life that appears
scientific is _____</p>

Question <p>The theory that God created the world in 4004 BC, from October
23rd, was propounded by _____</p>

Question <p>The theory that stated that life originated from non-living matter
is called _____</p>

Question <p>The theory of spontaneous generation was propounded
by _____</p>

Question <p>The theory that certain particles of matter contain "an active
principle" which could produce living organisms under favourable conditions is
referred to as _____-</p>

Question <p>The study of fossils is called _____</p>

Question <p>_____ is the wise use of natural available resources in
such a way that wastage, loss and harm are reduced or prevented</p>

Question <p>There are _____ main methods of conservation</p>

Question <p>Iron is usually found in the combined state as _____</p>

Question <p>There are _____ main types of chemical system</p>

Question <p>Energy available for doing work in a chemical system is
called _____</p>

Question <p>The crude oil resource has enhanced the growth of Nigerians
natural income since _____ when it became the major source of
government revenue.</p>

Question <p>Entropy is a measure of degree of _____ in a
substance</p>

Question <p>For every substance, as _____ increases, the degree of
disorder or entropy increases</p>

Question <p>_____ is the heat content of a system</p>

Question <p>Coconut is another common feature of the _____ forest.
</p>

Question <p>The high or open forest is also characterized by high
_____.</p>

Question <p>All chemical processes are associated with formation or breaking
of _____</p>

Question <p>There is need to conserve and _____ the natural
resources</p>

Question <p>Energy conversion to a man-made-process in which energy is made
more _____</p>

Question <p>Man belongs to a group of higher animals called _____</p>

Question <p>Transformation of plant debris into coal is called _____,

which may take millions of years to achieve.</p>

Question <p>There are_____ main methods of conservation.</p>

Question <p>Rubber is a natural product obtained from the _____of the rubber tree.</p>

Question <p>The resources from forests, wildlife, fisheries, soil and water are also known as _____ resources.</p>

Question <p>The wise use of naturally available resources in such a way that wastage, loss and harm are prevented or reduced is known as_____.</p>

Question <p>Bitumen materials are also called _____</p>

Question <p>Solar cell is a device which converts solar energy to_____.</p>

Question <p>Oil and gas provide about _____ percent of the energy used in the world</p>

Question <p>The oil shale deposits are usually rich in _____ materials.</p>

Question <p>The resources whose stock are in continuous supply are called _____</p>

Question <p>Glucose is a useful raw material in the production of_____</p>

Question <p>Energy conversion to a man-made process in which energy is made more_____</p>

Question <p>An aspect of chemistry that deals with the study of interconversion of heat and other kinds of energy is known as _____</p>

Question <p>The Biological name for plant is _____</p>

Question <p>Addition of Million reagent to a colloidal solution of protein which is heated gives a _____colour.</p>

Question <p>The yam slice or rice grain turns blue-black in colour if a drop or two of dilute_____ solution is dropped on it.</p>

Question <p>Glucose is a useful raw material in the production of _____</p>

Question <p>The resources whose stock are in continuous supply are called _____</p>

Question <p>The refrigeration is a modern fashion of the _____.</p>

Question <p>The glucose formed is converted to_____ and cellulose and stored in the body of plants.</p>

Question <p>The nuclear processes of the sun produce a large quantity of energy which is transmitted in the form of _____and heat waves.</p>

Question <p>An aspect of chemistry that deals with the study of interconversion of heat and other kinds of energy is known as _____</p>

Question <p>Bitumen materials are also called _____</p>

Question <p>Oil and gas provide about _____per cent of the energy used in the world</p>

Question <p>The oil shale deposits are usually rich in _____ materials.</p>

Question <p>_____is not a condition to determine if a reaction will occur spontaneously</p>

Question <p>_____is the energy in a body at rest</p>

Question <p>_____ is a device which converts solar energy to electricity.</p>

Question <p>Burning of _____in power plants can be used to convert chemical energy to electricity.</p>

Question <p>_____ involves process of changing energy from one form to another.</p>

Question <p>Energy conversion to a man-made process in which energy is made more_____</p>

Question <p>Energy available for doing work in a chemical system is _____</p>

Question <p>There are _____ main types of chemical.</p>

Question <p>These are different forms of energy except_____</p>

Question <p>Wallace and Darwin made a joint presentation on natural selection in year_____</p>

Question <p>The order Primate includes all except_____</p>

Question <p>Some endothermic processes take place</p>

Question <p>Entropy is a measure of degree of _____ in a substance</p>

Question <p>For every substance, as _____ increases, the degree of disorder or entropy increases</p>

Question <p>_____ is not a condition to determine if a reaction will occur spontaneously</p>

Question <p>Natural selection is the mechanism by which new species arise from pre-existing species was proposed by_____</p>

Question <p>All chemical changes in nature involve_____</p>

Question <p>The _____usually take place in chemical systems</p>

Question <p>The major theories that have been put forth accounting for the origin of life on Earth include_____</p>

Question <p>Which of these is not an evidence to support the theory of evolution_____</p>

Question <p>Man belongs to a group of higher animals called _____</p>

Question <p>Current evidence suggests that the earlier set of organisms

were_____</p>

Question <p>Geothermal Energy has been successfully utilized in the following countries except in _____</p>
