Question QMC1 : Ordinarily, the motherboard houses the expansion ___
Answer:

Question QMC2 : The Arithmetic Logic Unit comprises of the control unit and the __
Answer:

Question QMC3 : The input device that records voice data to the computer is the ___
Answer:

Question QMC4 : The computer system will reboot itself once the following combination of __ keys are pressed.
Answer:

Question QMC5 : The __ Key is used to end the current line of the text and start a new one when typing.
Answer:

Question QMC6 : On pressing the Caps Lock key, an indicator light appears at the top __ corner of the keyboard
Answer:

Question QMC7 : Most electronic keyboards closely follow that of the __ keyboard
Answer:

Question QMC8 : The monitor uses the same Cathode Ray __ similar to the television set
Answer:

Question QMC9 : The input device specifically used for computer games is the ___
Answer:

Question QMC10 : The mouse was originally designed for computer ___ that run on the windows operating system
Answer:

Question QMC11 : Ordinarily, television channel signals can be received on the computer by means of an appropriate __ device.
Answer:

Question QMC12 : The Inkjet and Laser Jet Printers are classified as __ printers.
Answer:

Question QMC13 : The mouse is commonly classified as a _____
Answer:

Question QMC14 : The __ is the standard output unit
Answer:

Question QMC15 : All the following are operations of the Central Processing Unit except the ___
Answer:

Question QMC16 : The first generation computers used _____
Answer:

Question QMC17 : The very large scale integrated circuit was employed by the _____ generation computers
Answer:

Question QMC18 : The first commercial electronic computer was the
_____
Answer:

Question QMC19 : The first computer to perform arithmetic and logical operations using a stored-program was the ____
Answer:

Question QMC20 : Communication and information activities entail the creation, storage, communication of data and ___.
Answer:

Question QMC21 : Originally, Babbage machines were___ in designs
Answer:

Question QMC22 : The __ system is important in computing because computers are designed to process, store and transmit data in the form of binary numbers and signals
Answer:

Question QMC23 : The first computer program was developed for Babbage's ___ Engine
Answer:

Question QMC24 : The ____ generation computers used transistors.
Answer:

Question QMC25 : The __ generation computers are those expected to mimic human intelligence.
Answer:

Question QMC26 : The third generation computers employed ____
Answer:

Question QMC27 : It is more expensive to produce __ Crystal Display used by laptops than the conventional monitor used by desktops.
Answer:

Question QMC28 : The __ makes it possible to interconnect directly or indirectly to all the other computer devices.
Answer:

Question QMC29 : The __ disk drive is the most common type of removable drive
Answer:

Question QMC30 : Jumping of instructions is a specific function of the
_____
Answer:

Question QMC31 : Generally, information is extracted from a body of ____ for communication.
Answer:

Question QMC32 : Symbols that have been used to communicate ideas or knowledge to others are classified as __.
Answer:

Question QMC33 : Among the specialised scientific methods or languages for expressing information with data are the __ number and counting systems
Answer:

Question QMC34 : Any medium that has been used to convey data symbols is referred to as data __.

Answer:

Question QMC35 : A motor car engine is a typical example of a __,

Answer:

Question QFB1 : Basically, a _____ is an instruction issued to the computer system for the purpose of executing a task

Answer: Command

Question QFB2 : In the course of typing, the _____ key is used to terminate an existing line of the text and start a new line.

Answer: Enter

Question QFB3 : A database is a common form of a/an _____ software.

Answer: Application

Question QFB4 : Essentially, the _____ software is required in order to run the computer hardware.

Answer: System

Question QFB5 : Software _____ is the empirical investigation conducted to provide stakeholders with information about the quality of the product or service under test.

Answer: Testing

Question QFB6 : Visual studio.net offers tools to assist a programmer in writing _____

Answer: Codes

Question QFB7 : Completeness is a key principle of _____ engineering.

Answer: Software

Question QFB8 : Initially, early computers had their software _____

Answer: Wired

Question QFB9 : Reliability is one of the goals of software _____

Answer: Engineering

Question QFB10 : Generally, the FORTRAN language handles _____ problems.

Answer: Scientific

Question QFB11 : Logically related computational units are gathered together in _____

Answer: Modules

Question QFB12 : _____ programming language deals with business problems.

Answer: COBOL

Question QFB13 : The operating system was introduced by _____

Answer: UNIX

Question QFB14 : Editing can actually be described as Text _____

Answer: Manipulation

Question QFB15 : A modelling _____ simply uses the power and speed of a computer machine to perform some mathematical calculations or

simulate some real life situations.

Answer: Software

Question QFB16 : Word _____ is the manipulation of characters by a machine to serve communication purposes.

Answer: Processing

Question QFB17 : Electronic _____ application is majorly used in business by accounting professionals to perform financial calculations

Answer: Spreadsheet

Question QFB18 : _____ management packages computerise the routine tasks of recording and filing of information.

Answer: Database

Question QFB19 : Microsoft _____ is a very good example of Desktop Publishing package.

Answer: Publisher

Question QFB20 : Microsoft _____ is an application used for presentations

Answer: PowerPoint

Question QFB21 : Microsoft Word is an application used for _____ preparation

Answer: Text

Question QFB22 : Microsoft _____ is a suitable application for easier calculation

Answer: Excel

Question QFB23 : Oracle provides application for _____ application

Answer: Database

Question QFB24 : Formatting entails changing the _____ of a document.

Answer: Appearance

Question QFB25 : Ordinarily, _____ are arranged as columns in a Database table

Answer: Fields

Question QFB26 : Essentially, the instructions meant to run an application are stored in _____ files

Answer: Program

Question QFB27 : _____ Files are used for storing information created by means of an application.

Answer: Data

Question QFB28 : Typically, every drive has what is called a root directory also referred to as a _____

Answer: Folder

Question QFB29 : In the disk _____ system, a file name cannot exceed eight characters

Answer: Operating

Question QFB30 : The file name _____ cannot exceed three characters in the Disk Operating System (DOS).

Answer: Extension

Question QFB31 : The process of removing program errors in the course

of software development is referred to as _____

Answer: Debugging

Question QFB32 : At the _____ stage of software
development, a programmer plans the logic of the solution.

Answer: Design

Question QFB33 : The third phase of software development involves
writing or _____ the program

Answer: Coding

Question QFB34 : The _____ level language is the only
language the computer can actually interpret

Answer: Low

Question QFB35 : The Assembly language was developed to use symbolic
names or _____

Answer: Mnemonics
