CIT104

Supercomputers came about during the _____ generation of computers

Second

Early computer were large in size and too -------- to be owned by individual

Expensive

The computer system is made up of hardware and _____

Software

MS Multiplan is an example of _____ packages

Spreadsheet

Integrated circuits is the main innovation of the ____ generation of computers

Third

_____ Generation computers were developed during 1954 - 1962

Second

The computer software is classified into _____ major groups

Two

The switching device for the _____ generation computers hss Very Large Scale Integrated (VLSI) circuit.

Fifth

Computers manipulate data in many ways, and this manipulation is referred to as _____

Processing

The co-processor used to assist some CPUs in number-crunching activities is known as _____

Math

_____ emits the computer's sound output

Speaker

When a Computer is switched off, anything held in _____ Memory is lost

Random access

The first stage of program debugging is

Desk checking

All the electronic components in a personal computer are mounted on a piece of fiberglass called _____

Motherboard

The _____ does all computer system's thinking and runs the programs as requested

Processor

_____ is the process of dividing the disk into tracks and sectors

Formatting

When errors are detected in a program, a series of diagnostics referred to as an error ____ list is generated by the language translator

Message

_____Store data or information temporarily and passes it on as directed by the control unit

Register

Simplification of program maintenance is an advantage of program ____

Documentation
Insert key is denoted by_____ on the keyboard

INS
In a ____ processing operating system environment, users submit jobs to a
central place for processing.

Batch
Computer viruses are written programs. TRUE or FALSE?

TRUE
In a decision table the section which contains a list of all possible conditions
which could apply in a particular problem is called Conditions _____

Stub
Junk e-mail is also called _____

Spam
A _____ branch statement will cause the computer to branch to a statement only
when certain conditions exist

Conditional
A _____ is a software program used to view Web pages

Browser
____ operating system will be best suited for systems controlling aircrafts.

Real time
._____ is a default file extension for all word documents.

DOC
In Visual basic Environment, the title screen that appears when your application
first begins is called _____ screen.

Splash
An email account includes a storage area often called _____

Mailbox
COBOL is an example of _____ -level language

High
_____ Software are specific to users' needs

Application
_____ are computers that provide resources to other computers connected to a
network

Servers
_____ is a collection of related information defined by its creator.

File
A finite sequence of instructions which gives an unambiguous method of solving a
problem is known as _____

Algorithm
The following are characteristics of a computer EXCEPT __

cyclic

Computer users can be classified as expert users and _____

Casual users

The Acronym for the first general purpose programmable electronic computer was

ENIAC

Which of the following is NOT an advantage of mechanical method of data processing?

Ease of correcting errors

Magnetic core-based memory technology is accessed in ------ order

Random

The following are peripheral devices of the computer system EXCEPT

Cache memory

Which of the following is NOT part of the computer processing unit?

Hard disk unit

In which computer generation do we have computers that were very large in size?

First Generation Computer

Which of the following methods of data processing involves the use of typewriter?

mechanical method

Which of the following computer resources is most likely to be a shared common resource in a networking environment?

Printers

Physical structure of computer is called _____

Hardware

Computer system that attempts to gain the advantage of both the digital and the analog elements is known as _____

Hybrid

Transistor technology belongs to the _____

Second generation computers

Which is not a basic function of a computer?

Copy text

The computing system is made up of the following EXCEPT

The computer analyst

Semi-conductor memories came about in the

Third generation of computers

Based on signal type, the types of electronic computers are basically

Three

The power supply unit of computer converts high voltage to _____ voltage.

Low

To prevent the loss of data during power failures, use _____

Uninterruptible Power Supply

_____ unit of the CPU directs and coordinates all activities within it and determines the sequence in which instructions are executed, sending instructions sequence to other smaller unit.

control

Classifying computers based on signal type, the class of computers that measures is_____ computers.

Analog

Which of the following Statements is NOT true about Special purpose computers?

very much expensive than the General-Purpose type

Which of the following memory is both static and non-volatile?

ROM

The acronym BIOS represents _____

Basic Input Output system

The acronym DOS stands for _____

Disk Operating System

Sound card is an expansion card that plugs into one of the slots on _____

Motherboard

A computer program that converts an entire program into machine language is called _____

Compiler

The following are examples of database packages EXCEPT

SPSS

Which of the following statements about personal computers is FALSE?

cannot be used to create illustrations

One of these is a classification of Computer Software.

Application software

____ key is used in combination with another key to perform a specific task

Control

A system that allows more than one active user program to be stored in main memory simultaneously is known as _____

Multiprogramming

Which of the following is one of the functions of an operating system?

All of the options

In program development stages, devising of solution method comes _____

second

Which of the following refers to a small, single-site network?

LAN
